

Industry Heroes

Our story is a celebration of your stories.

For years, Chandler Concrete was operating using outdated batching systems from both Command Data and Alkon. In only the last 2-3 years, Communications Manager Peter McDaniel, has impressively upgraded all their 41+ plants with the latest version of our [COMMANDbatch](#) solution.

With these upgrades, they are seeing a difference in their throughput speeds, cycle times, and precision – especially in their new plants. Their plant just outside of Burlington is able to batch a 10-yard load in under three minutes!

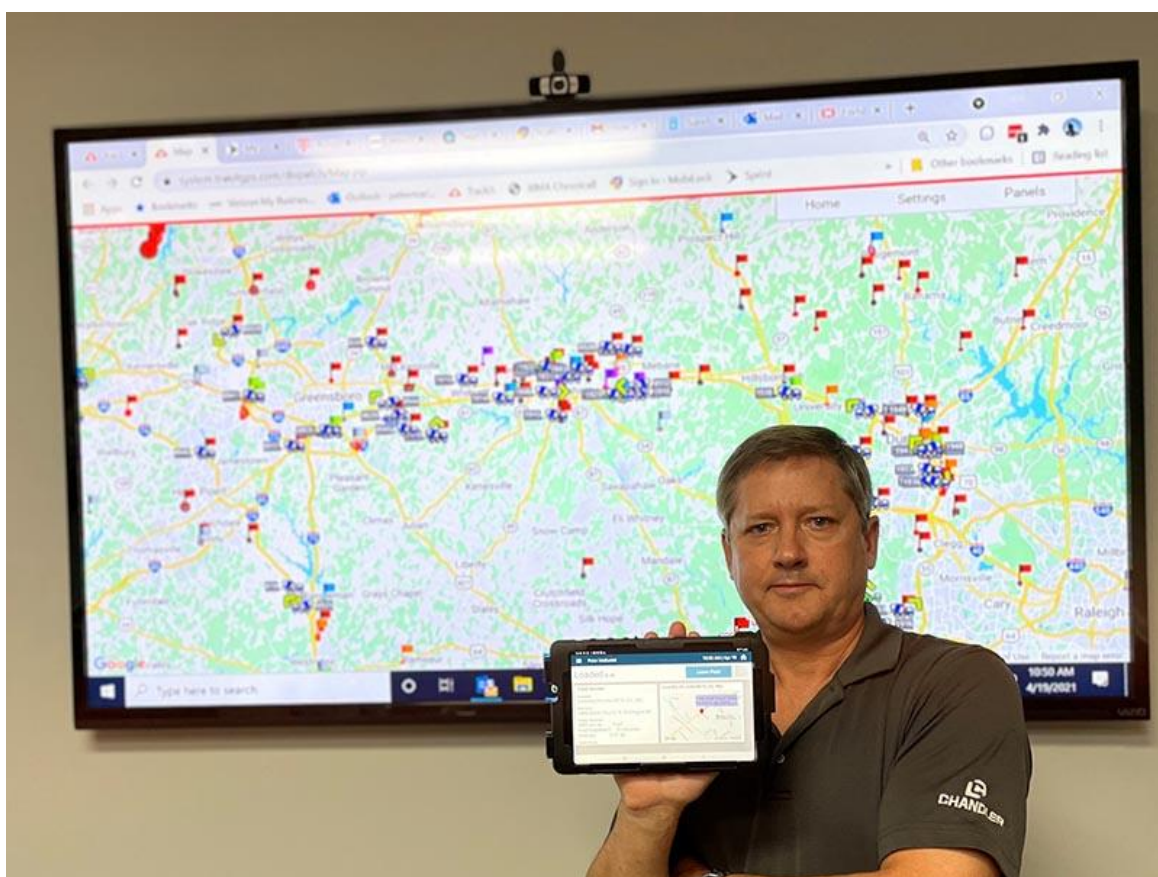

To further boost efficiencies across their ready mix operations, Chandler Concrete implemented our [TrackIt](#) GPS and telematics solution for their 200+ trucks, and will soon be implementing MOBILEticket, too.

[Get this Industry Hero Story Now](#)

**"The old joke was whenever you call a ready mix company and ask where your truck is, the standard answer is 'it's on the way.'
Now, we really do know where the truck is. We can give the
customer good, accurate information."**

Peter McDaniel | Communications Manager | Chandler Concrete
