

SYSDYNE - June 2023

Wishing O&G Industries a Happy 100 Year Anniversary

Sysdyne Proud to Be Partner of Over a Decade

O&G Industries has been a staple in the state of Connecticut since 1923! Operating today as a fourth generation, family-owned construction services and materials business, O&G has grown to over 8 ready-mix plants, 9 asphalt plants, 4 quarries, and offers construction management, general contracting services, and more. They are the state's largest privately held construction company, one of the country's Top 400 Contractors, and a Top 100 Green Building Contractor.

Our relationship with O&G Industries began over a decade ago as TJ Oneglia, O&G's VP of Construction Materials, led their ready-mix division as pioneer of Sysdyne **CloudBatch**, the world's first and only Cloud-Native concrete batch control solution.

After successful implementation at their first plant, O&G has since upgraded others one by one, and later implemented our **ConcreteGO** dispatch and **iStrada** GPS and delivery management solutions. We thank the O&G Team for choosing Sysdyne as their ready-mix software provider, and once again offer our congratulations to their 100 years in business.

We look forward to working together for many more to come!
