

# DIGITALFLEET

---

**Revolutionizing the Ready Mix Construction Industry**  
*With Weekly Improvements*

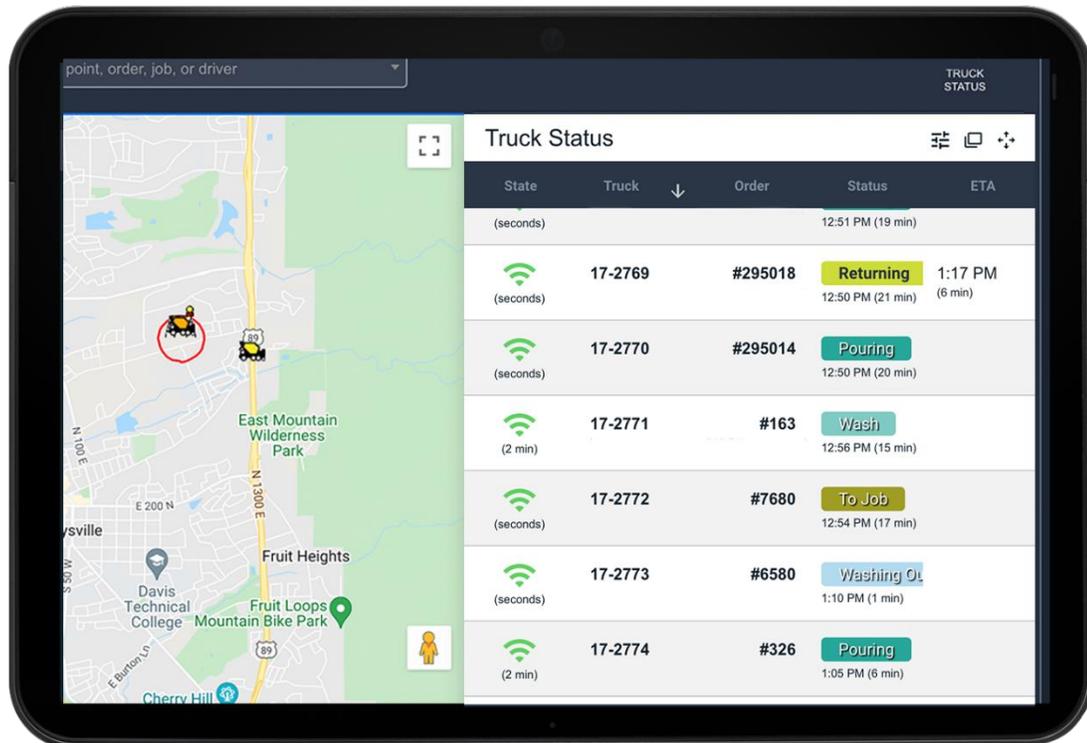

**New Feature Highlights**  
**Multiple Enhancements To Washout**

With automated notifications, have complete visibility without distracting

your drivers.

- **Washout Zone Automation** - We added the ability to create a geofence around the "Washout Zone" to automatically trigger the truck's status.
- **Time & Location Automation** - We created an automatic transition to Washing Out and Washed Out based on time and location.
- **Truck Status Awareness** - When a truck is Washing Out, we will not move the truck back into the pouring state.
- **Dump Zones** - When a truck enters a dump zone, the truck cannot auto transition to Begin Pour, End Pour, or Washing Out. No ticket events will be created and no status changes will be made upon entry into a dump zone. Dump zone entries/exits will be tracked like any other point and can be viewed with the Geofence report.
- **More Washout Features** - We also have an automated [End of Day Plant Washout](#), to help your plants' communication shutdown process.

### Additional Highlights:

- **New Auto-Statusing of Dump Trucks** - Digital Fleet+ is now available for aggregate trucks. This includes auto-statusing of dump trucks ([requires hardware and DigiTrack update](#))

- **End Pour Automation-** Automatically trigger an End Pour event if the truck is in a Pouring status and is traveling more than 25mph.
