## Ready Mixed Concrete Prices are Flat Despite Rising Input Costs

While the \$123.92 weighted average selling price of ready-mix concrete is virtually flat versus the selling price in the fourth quarter of 2020, input costs have been rising.

The National Ready Mixed Concrete Association estimates that the US concrete industry shipped 378 million cubic yards of ready-mixed concrete during 2020 and the five companies included in the Concrete Financial Insights Index of weighted average ready mixed concrete pricing represent only 7% of that volume. It is likely that this group's weighted average pricing is higher than that of the overall US industry because these five firms have the technical capabilities and plant locations to service large commercial and infrastructure projects requiring higher strength mixes with more costly blends of raw materials.
