## The New Multi-Division Feature in ConcreteGO® Cloud Dispatch Meets the Needs of Enterprise Concrete Suppliers

Enterprise dispatch systems can create tremendous value for concrete producers by helping streamline decisions and improving communication. Using the multi-division feature in **ConcreteGO** users can assign multiple levels of permissions, hierarchy and access rights to different divisions within the same company to simplify what was once a tedious and complex process.

Managing multiple divisions within the same company has never been easier! **Click below** *for all the details*

HIERARCHY

Using **ConcreteGO**'s new multi division feature gives administrators ultimate flexibility in setting up new users and assigning them to specific divisions, regions or companies within the same organization. Simply add a new user in ConcreteGO cloud dispatch and the default division will become the user's new point of access. Administrators can easily manage, remove or make modifications to a user's access rights from all in one place.

VALUE
• Robust enterprise level solution for multiple division companies
• Flexibility that can easily be adapted to an organization's existing structure
• Improved management tools to promote better business focus

Using Sysdyne's **ConcreteGO** cloud dispatch system, Ready-Mix producers can easily manage multiple divisions within the same organization more effectively. Users only see the plants and locations for which they have been given authorized access, improving security and simplifying communication.
