

Highlight Week of Nov 30th

Tuesday, December 1st 3:00 PM CST
Building Community on CONNEX

Ryan Bartholomew and Matt Jetmore | Lauren Concrete

Steve Cox and Chris Strickland | Command Alkon

What does it mean to build community on CONNEX? Hear directly from those that have built a network of trading partners on CONNEX and are realizing the benefits to all supply chain participants of real-time collaboration on a single platform. For ready mix producers this means using real-time digital workflows with your inbound materials suppliers as well as with your materials buyers at the jobsite. For aggregate, asphalt, and cement suppliers building community on CONNEX means fulfilling demand requests from your ready mix customers as well as your building contractors using a single system and set of processes. For the building contractor it means one platform for all your heavy materials suppliers, for all of your projects. Why manage multiple systems and disjointed, manual processes for each of your trading partner relationships or for each of your materials types? Make a move to real-time visibility into productivity and costs, accurate tracking of assets and transactions, and simplified invoicing and payment processes by building your community on CONNEX.

Thursday, December 3rd 1:00 PM CST
COMMANDbatch Scale Discharge Settings
Mark Sinclair | Command Alkon

This session will cover the tools currently available in COMMANDbatch that assist users in diagnosing issues with a batch plant's discharge cycle. The settings in COMMANDbatch that control when and how fast materials are introduced to a mix will be explained. Solutions and best practices for mix specific issues with the discharge cycle will be demonstrated and discussed, as well.
